

## QuickSSL™

### Web Server Certificates

Ultimate online protection from an Internationally recognised security brand at a remarkably low price, delivered in just 10 minutes.

With GeoTrust QuickSSL™ Web Server Certificates, you and your customers can conduct secure Internet transactions with the complete confidence you deserve. QuickSSL offers true 128-bit encryption that's fully compatible with leading web browsers including Microsoft, Internet Explorer 5.01 and higher, and Netscape/AOL browsers 4.51 and higher — all at a fraction of what you'd pay for other SSL solutions. And unlike competitive products, you don't have to wait days for SSL security; GeoTrust QuickSSL offers airtight Internet protection in **only ten minutes**.

By activating the browser's "LOCK" icon, QuickSSL assures your online visitors that credit card account numbers and other confidential information cannot be viewed, intercepted or altered. And because our automated authentication system is the most advanced in the industry, your customers and trading partners can be sure that QuickSSL Web Server Certificates are only issued to fully authorised recipients.

Best of all, our leadership pricing structure means you don't have to pay a lot for the reliable Internet protection you need. Because GeoTrust systems can automatically verify that a certificate holder has appropriate administrative right to a web server's domain, our costs for issuing QuickSSL certificates are significantly lower than competing SSL products — and we pass those savings on to you.

Only GeoTrust QuickSSL offers these important features:

- True 128-bit strong SSL encryption
- Compatible with 99% of all browsers
- Fully automated 10 minute provisioning process
- Single root certificate - means quick and easy install
- AICPA WebTrust compliant
- Multi-year certificates at considerable savings!
- New! Business registration (DUNS number equivalent)
- New! Real-time, two-factor telephone authentication

We'll even notify you of renewal requirements in advance so you can be sure that your QuickSSL is always operating at optimal levels — seamless protection for your online business, and important 24x7 assurance for your customers.

#### Customer Success Story #63

"GeoTrust had us up and running very quickly. I especially appreciate the verification through domain e-mail or secondary domain... thanks for a good experience."  
Jess Coburn, MCSE
