

True Credentials Express™ Client Certificates

True Credentials Express Benefits

Speed in issuing client certificates

Low cost entry

Immediate sign-up via web site

Small deployments

Intuitive web-based management application

Managed Trust Service for Rapid Deployment of Client Certificates.

True Credentials Express is everything you need to get started with a fully managed enterprise trust service - without the wait. Registration for this service is fully automated, enabling enterprises to deploy a client-side certificate system within minutes.

True Credentials Express enables instant access to client certificates for secure e-mail (S/MIME), client authentication, VPN applications and paperless transactions, in order to increase the efficiency of your business and enable trusted transactions for e-commerce opportunities and revenue growth.

Only GeoTrust True Credentials Express offers these important features:

- Instant deployment - Just 10 minutes!
- Intuitive web-based management tool
- Strong cryptographic technology
- Convenient credit card payment options
- Shared public CA model
- Multiple registration options
- Tailored vetting rules specific to your needs
- Multiple enrollment options
- Personalized e-mail options
- Customized certificate content
- Instant revocation capability

True Credentials Express enables the following applications:

- Secure messaging for S/MIME applications
- Secure access for web applications
- Secure access for VPN applications
