Identity Assurance for Web Sites

Internet Trust Spotlight

Where does Internet confidence come from?

85% of consumers surveyed cite a lack of confidence in Internet security as the major obstacle to conducting business on the Internet. For proven Internet trust solutions that work — and the online confidence your customers demand — go to

www.geotrusteurope.com now.

Building consumer confidence in the online world.

Exactly who are you doing business with online? As e-commerce grows in scope and frequency, it's a question more and more customers are asking — and one that GeoTrust's True Site can answer. This leading-edge trust solution is a fast, user-friendly way for your customers to identify and confirm your web site's authenticity — and provide the kind of online consumer confidence that can result in a significant increase in online activity and sales.

Grow your business with patented "Smart Seal" technology.

Here's how it works: Our patented "Smart Icon" technology resides on your web pages, and automatically identifies your site as authentic and validated by an independent third party. When a customer visits your web page, their browser will automatically perform a domain lookup to confirm that he is clicking on a legitimate site. At that time, GeoTrust performs a rigorous process to identify your site and upon verification, the True Site "Smart Icon" is presented for authenticity.

Example True Site Smart Seal - your True Site displays your company name

Foolproof validation and cost-effective.

Unlike other validation products, True Site features an embedded "real-time" date/time stamp that cannot be recreated as a static image. That's the kind of clear, objective — and instantaneous — online validation customers are looking for, and the best possible way to grow your revenue from web-based transactions. True Site is cost-effective, too. Annual enrollment is available at special low introductory prices.

Innovating Information Security.

GeoTrust, the leading provider of next generation information security services, delivers secure e-commerce transactions, identity verification and authentication solutions to the global web community. GeoTrust ensures a new level of e-business security — your first step toward leveraging the full business potential of the Internet. GeoTrust is a highly respected and long-time established AICPA WebTrust compliant Certification Authority with internationally recognised security brands.
